College of Agriculture & Natural Sciences

School of Physical Sciences

Department of Computer Science & Information Technology

End of First Semester Examination - 2019/2020

CSC101: Introduction to Computing

Duration: 2 hours

Answer all questions on the question paper.

Circle the most appropriate answer.

Only ONE attempt per question

Registration Number: PS/…… /……./00…….

Date: 17th December, 2019

Registration Number:_____

1. The categorization of computers is determined by the following **except**
   a. Size
   b. Speed
   c. Price
   d. Processor

2. A copyrighted software provided at no cost can be referred as
   a. Shareware
   b. Freeware
   c. Open source
   d. Public domain

3. Any external device attached to a computer can be called
   a. Hardware
   b. Peripheral
   c. System unit
   d. Output device

4. Which of the following shortcut will minimize all windows?
   a. Windows key + M
   b. Ctrl + Shift + Esc
   c. Windows key + down arrow
   d. Windows key + F1

5. Which of the following is **not** a factor that affects the quality of a display device?
   a. Resolution
   b. Brightness
   c. Dot pitch
   d. Screen size

6. In which year was Ghana connected to the Internet?
   a. 1994
   b. 1980
   c. 1990
   d. 1985

7. Which of the following shortcut will rename a selected file?
   a. F1
   b. F2
   c. F4
   d. Ctrl + R

8. Which of the following is **not** a criterion for evaluating the accuracy of a website?
   a. Authority
   b. Accuracy
   c. Citation
   d. Currency

9. Software that adds functionality to a browser such as Internet Explorer is known as_____
   a. extension
   b. plug-in
   c. browse tool
   d. socket

10. Which of the following is an example of a phishing attack?
    I. Sending someone an email that contains a malicious link that is disguised to look like an email from someone the person knows
    II. Creating a fake website that looks nearly identical to real website in order to trick users into entering their login information
    III. Sending someone a text message that contains a malicious link that is disguised to look like a notification that the person has won a contest.
    a. I
    b. II
    c. I&II
    d. I, II&III

Registration Number:_____

11. A visual representation of a non-text information such as drawing and photos is known as
    a. Graphics
    b. Animation
    c. Video
    d. Audio

12. *portal.ucc.edu.gh* is an example of _____ website.
    a. B2C
    b. C2C
    c. B2B
    d. None of the above

13. All of the following are examples of real security and privacy risks **except**:
    a. hackers
    b. spam
    c. viruses
    d. identity theft

14. The alt key is part of the _____keys on a keyboard.
    a. positional
    b. modifier
    c. function
    d. toggle

15. Which of the following is **not** located on the motherboard?
    a. Processor
    b. chipset
    c. buses
    d. touchpad

16. Which of the following is **not** an example of operating system?
    a. Chrome
    b. Macintosh
    c. Microsoft
    d. Ubuntu

17. An independent computer program that copies itself from one computer to another over a network is called
    a. worm
    b. Trojan horse
    c. bug
    d. virus

https://dcsit.ucc.edu.gh/level_100

Figure 1: URL for DCSIT-UCC

USE FIGURE 1 TO ANSWER QUESTIONS 18 – 20

18. The part of the URL that represent the subdomain is
    a. dcsit
    b. gh
    c. level_100
    d. ucc

19. The part that represent top level domain is
    a. https
    b. edu
    c. gh
    d. edu.gh

20. The part that represent domain name is
    a. dcsit
    b. ucc
    c. dcsit.ucc
    d. ucc.edu.gh

21. The shortcut used to maximize or restore a selected window is _____
    a. Ctrl + F7
    b. Ctrl + F8
    c. Ctrl + F9
    d. Ctrl + F10

22. Which of the following printers produce the best graphics?
    a. Laser
    b. inkjet
    c. plotter
    d. thermal

Registration Number:_____

23. A key logger is a type of
    a. Worm
    b. Trojan horse
    c. virus
    d. spyware

24. Tricking employees to reveal their passwords by pretending to be a legitimate member of a company is referred to as
    a. Sniffing
    b. social engineering
    c. phishing
    d. pharming.

25. What is the shortcut key to close a document?
    a. Alt + F4
    b. Ctrl + W
    c. Ctrl + Q
    d. Ctrl + D

26. Which part of the CPU does the actual processing?
    a. Cache
    b. ALU
    c. control unit
    d. register

27. Which of the following is **not** an example of input device?
    a. Camcorder
    b. Flash drive
    c. Game controller
    d. Trackball

28. Computer malicious program which is activated when a specific set of conditions is met is called
    a. Trojan horse
    b. Virus
    c. Worm
    d. logic bomb

29. How do software vendors correct flaws in their software after it has been distributed?
    a. Issue bug fixes
    b. Issue patches
    c. Re-release software
    d. Issue updated versions

30. Computer crime includes:
    a. Creating viruses
    b. Stealing credit card numbers
    c. Unauthorized use of computer
    d. All of the above

31. Which of the following is equivalent to 1 trillion bytes?
    a. Gigabyte
    b. Kilobyte
    c. Megabyte
    d. Terabyte

32. A program that monitors user activity on internet and transmit that information in the background to someone else is known as
    a. Malware
    b. Spyware
    c. Adware
    d. Crimeware

33. The shortcut key to undo an action is _____
    a. Ctrl + Z
    b. Ctrl + U
    c. Ctrl + Y
    d. Ctrl + Del

34. Soft copy refers to
    a. Digitizing
    b. Music sounds
    c. Printed output
    d. Screen output

35. The sharpness and clarity of an image on a computer screen is call
    a. Brightness
    b. Dot
    c. Pixel
    d. Resolution

Registration Number:_____

36. Which of the following is the **odd** one out?
    a. ICloud
    b. Google drive
    c. Chrome
    d. Dropbox

37. Which of the following statements best describe a computer?
    a. Anything that can processes data into information that is useful to people
    b. Any electronic device that processes data into information that is useful to people
    c. Any electronic device that allows users to input data and communicate to people
    d. An electronic device dedicated to providing one or more services to people

38. Software that consists of programs designed to make users more productive and/or assist them with personal tasks is known as
    a. Application
    b. Gaming
    c. Operating system
    d. System

39. A software or hardware device that filters the information coming through an internet connection to a network or computer system is known as _____
    a. Antivirus
    b. Cookies
    c. Firewall
    d. Cyber safety

40. Ctrl + X is used to _____
    a. Copy selected items
    b. Cut selected items
    c. Move the selected data
    d. Exchange selected items

41. The factor(s) which would strongly influence a business person to adopt a computer is it
    I. Accuracy
    II. Reliability
    III. Speed
    a. I & II
    b. I & III
    c. II & III
    d. I, II & III

42. Unsolicited commercial email is known as _____
    a. Spam
    b. Virus
    c. Spyware
    d. Malware

43. A technique used by software manufacturers to ensure that users only install software on legally licensed computer is
    a. Registration
    b. Product key
    c. Product Activation
    d. License agreement

44. URL means
    a. Address of the resource on the web
    b. Term used to describe a web site
    c. Term used to access online programs
    d. Term used to connect computers to the web

45. Which of the following programs is used to design a webpage?
    a. HTML
    b. Browser
    c. Web server
    d. HTTP

46. World Wide Web was proposed by
    a. Bill Rogers
    b. Tim Berners-Lee
    c. ARPANET
    d. Bill Gates

Registration Number:_____

47. Which of the following is not an extension of a webpage
    a. .html
    b. .php
    c. .com
    d. .asp

48. Internet can best be described as
    a. A single network
    b. A collection of different networks
    c. Interconnection of LANs
    d. None of the above

49. What is the shortcut key to open a document?
    a. Ctrl + N
    b. Ctrl + S
    c. Ctrl + O
    d. Ctrl + D

50. The term bit is short for
    a. megabyte
    b. binary language
    c. binary digit
    d. binary number

51. A set of rules that defines how webpages transfer on the Internet is known as _____
    a. Top-level domain
    b. IPv4
    c. Hypertext Transfer Protocol
    d. Web 2.0

52. The term cybercrime can best be defined as
    a. Any crime that uses computes to jeopardize or attempt to jeopardize national security
    b. The use of computer networks to commit financial or identity fraud
    c. The theft of digital information
    d. Any crime that involves computers and networks

53. Which of the following is **not** a browser
    a. Safari
    b. Mozilla firefox
    c. Internet Explorer
    d. Google

54. Which of the following best describes soft lifting
    a. Borrowing and installing a copy of a software application from a colleague.
    b. Installing more copies of the software than you have licenses for.
    c. Installing and selling unauthorized copies of software on refurbished or new computers.
    d. Duplicating and selling copyrighted programs.

55. A group of computers that is networked together and used by hackers to steal information is called
    a. Botnet
    b. Rootkit
    c. DDoS
    d. Ransomware

56. Which of the following is **not** a function of the operating system?
    a. establishing Internet connection
    b. managing programs
    c. monitoring performance
    d. virus protection

57. Application software that are usually sold bundled together is termed as
    a. Office
    b. Suite
    c. Pack
    d. App

Registration Number:_____

58. The sequence of numbers that uniquely identifies the location of each computer or device connected to the Internet is termed
    a. Internet backbone
    b. domain name
    c. IP address
    d. TLD

59. Computer literacy involves having a current knowledge and understanding of _____.
    a. Computer programming
    b. Computers and their uses
    c. Computer repair
    d. All of them

60. Windows 98 is a(n)
    a. Systems program
    b. Application program
    c. Productivity software
    d. Freeware

61. Pressing the Backspace Key in the active document:
    a. Deletes the character to the right of the cursor
    b. Moves the cursor to the beginning of the line
    c. Deletes the character to the left of the cursor
    d. Moves the cursor to the beginning of the Paragraph

62. Which shortcut key moves the cursor directly to the beginning of a line?
    a. F1
    b. Delete
    c. Home
    d. Shift + alt

63. An employee using an organization's computer to send personal email messages might be an example of _____
    a. Cybercrime
    b. hardware vandalism
    c. intellectual property rights violation
    d. unauthorized access and use

64. What does the https:// at the beginning of a URL denotes?
    a. The site has a special high definition graphics
    b. Information entered into the site is encrypted
    c. The site is not accessible to certain computers
    d. The site is the newest version available

65. What kind of cybersecurity risks can be minimized by using a virtual private network (VPN)?
    a. Use of insecure WiFi networks
    b. Key-logging
    c. Phishing attacks
    d. De-anonymization by network operators

66. Desktop operating system are also known as client operating system.
    a. True
    b. False

67. UNIX is an example of open source software.
    a. True
    b. False

68. A set of instructions programmed on a hardware is known as firmware.
    a. True
    b. False

69. The motherboard's capabilities is determined by its form factor.
    a. True
    b. False

70. A typical license agreement allows a user to rent or lease the software.
    a. True
    b. False

Registration Number:_____

71. An unencrypted, readable data is called ciphertext.
    a. True
    b. False

72. Antivirus software can detect and eliminate viruses that are trying to enter your system.
    a. True
    b. False

73. Privacy is the state of being free from danger or threat.
    a. True
    b. False

74. A mouse controls the movement of the pointer on a monitor.
    a. True
    b. False

75. Every device connected to the Internet is assigned an IP address.
    a. True
    b. False

76. SSL is a protocol used to secure information transfer over the Internet.
    a. True
    b. False

77. MSN and google are example of portals.
    a. True
    b. False

78. Bing is an example of search engine.
    a. True
    b. False

79. The amount of data that travels over a network is referred as gigabit per second.
    a. True
    b. False

80. Stylus is an input device.
    a. True
    b. False

81. Microsoft is an operating System.
    a. True
    b. False

82. Any illegal act involving the use of a computer or related devices generally is referred to as a crimeware.
    a. True
    b. False

83. The physical size and shape of devices such as the motherboard and hard disk is known as form factor.
    a. True
    b. False

84. Turning off the GPS function of our smartphone prevents any tracking of your phone's location.
    a. True
    b. False

85. URL is also known as web address.
    a. True
    b. False

86. Internet and web can be used interchangeably.
    a. True
    b. False

87. KaiOS is an example of mobile operating system.
    a. True
    b. False

88. Earbuds are a type of input device.
    a. True
    b. False

89. Operating system are a widely recognize example of system software.
    a. True
    b. False

Registration Number:_____

QUESTIONS 90–100 IS BASED ON PYTHON PROGRAMMING

90. What is the output of the following code:

```
print 9//2
```

a. 4.5
b. 4.0
c. 4
d. Error

91. What is the output of the following code:

```
a = 5
b = 10
b = a
a = b
print b
```

a. 10
b. 5
c. 15
d. 20

92. Which of the following **cannot** be used as a variable name?

a. as
b. in
c. it
d. is

93. What is the output of the expression:

```
3*1**3
```

a. 27
b. 9
c. 3
d. 1

94. What is the output of the expression:

```
1+2-3*4/5
```

a. 1
b. 3
c. 1.5
d. 3.5

95. Which of the following is an invalid variable?

a. my_string_1
b. 1st_string
c. Foo
d. _boo

96. Which of the following is **not** a keyword?

a. eval
b. assert
c. nonlocal
d. pass

97. Which is the correct operator for power(x^Y)?

a. X^y
b. X**y
c. X^^y
d. X exp Y

98. Which one of the following has the highest precedence in the expression?

a. Exponential
b. Addition
c. Multiplication
d. Parentheses

99. Which of the following symbols are used for comments?

a. //
b. "
c. /**/
d. #

100. Which of the following is correct way to declare string variable?

a. fruit = 'banana'
b. fruit = "banana"
c. fruit = banana
d. fruit = (banana)
