TEACHING SCHEDULE

WEEK	TOPIC(S) FOR DISCUSSION
1	Physical Quantities & Units, Dimensional Analysis
2	Vectors I: addition, graphical resultants, resolution
3	Vectors II: unit vectors, dot and *cross products*
4	Dynamics: force, mass, weight, Newton's laws & their applications
5	Dynamics: Momentum; Types of collisions; friction
6	Kinematics: graphs, equations of motion, *projectiles*
7	Circular Motion, Simple Harmonic Motion
8	Mechanical Work, Energy and Power
9	Elasticity: Young's modulus; stress-strain curve
10	Kinetic theory and gas laws; Thermometry
11	Heat Capacity & Thermal Conductivity
12	REVISION
13	End-of-semester exams
